

CHOPPER TABAR 72

LOW HP, HIGH OUT PUT
Tabar 72 is one of the most successful and well proved maize choppers.

After harvesting , the stems are carried towards the chopping blades by the feeder chains and then loaded. This short procedure leads to the maximum output (more than 50ton/h).

The material of chopping blades are designed to be more stable against the different defects such as tritiation, etc.

Technical features

Power	minimum 65 H.P.		
P.T. d	540&1000 rpm (optional)		
Capacity	75 ton/h		
Height	3.5m		
Length	4.30m		
Width	2.61m		
Weight	125kg		

Chop lengths in mm

No. of the blades	8	4	2
Speed 1	4	8	16
Speed 2	6.5	13	26
Speed 3	13.4	27	54
